

# FlashGuard in Philly

**Challenge:** “We were looking for the best way to insure that our customers have no leaks in their roofs for the life of the system. We have tried about all the flashings that are on the market for sealing penetrations made when mounting solar panels.”

**Solution:** “We found Flashguard to be the best – it provides 100% foolproof, long-lasting protection.”

**Result:** “We are very pleased with the product. It is easy to install and durable.”
